

ROCKET 

Solutions for all your wooden constructions \

RELOCATION OF PRODUCTION

An industrial first

Already established in the Ardennes with logistics, packaging, printing, etc., Vynex innovates and launches the industrial production of ROCKET screws.

ROCKET is designed at Vynex in France, but historically manufactured in Taiwan.

Reconnecting with local know-how

The manufacture of mass-produced fasteners by cold stamping has almost disappeared in France; the market is dominated by supply manufacturing from Asia.

For Vynex, this has been a strategic priority for several years in order to defend and develop its ROCKET brand in the long term.

25% of production in the Ardennes

Initially, Vynex plans to relocate approximately 25% of ROCKET production and develop additional volumes of long technical screws.

In the longer term, Vynex intends to develop its industrial know-how by creating this sector in France. This approach is part of the company's CSR plan to reduce its carbon footprint by using more local resources.

ROCKET★

ROCKET★

A ROCKET PRODUCT FOR EVERY PROJECT

We offer a range of screws designed to provide solutions for wood assemblies and fastening.

There are a number of different ROCKET products.

ROCKET★

Solutions for all your wooden constructions

WOOD & CHIPBOARD

For all jobs

individual products

ROCKET' screw characteristics

4 notches below the head

• Wood milling
Better contact with metal

Triple cone

• Greater penetration and higher torque resistance

Zinc coated steel

• Chromium III

6 Grooves below the thread

• Improved screwing torque

Wider interval

• Quicker screwing

Variable groove and thread diameters

• Reduce frictions and save battery

End cutting

• Prevent wood splitting

81%

of professionals are familiar with our products*

26%

of carpenters and joiners use ROCKET's screws*

* Research carried out by XERFI in 2022 among 900 carpentry and joinery companies in France.
